

DNASTAR, INC.
LASERGENE SOFTWARE
INTERNAL RESEARCH SITE AND INTERNAL RESEARCH
PURPOSES LICENSE AGREEMENT

Please read the following terms and conditions carefully. This legal document is an Agreement between the person or organization who purchased this software (the licensee) and DNASTAR, Inc. (the licensor). You, on behalf of the licensee, are agreeing to become bound by the terms of this Agreement, which includes a software license to use this version of the Lasergene software.

1. DNASTAR, Inc. grants the licensee a non-exclusive license to use this version of the Lasergene software purchased from DNASTAR, Inc. solely in conjunction with internal research performed by the licensee. Use of the licensed software is subject to the terms of this Agreement.
2. The software and accompanying written materials are subject to copyrights owned by DNASTAR, Inc. The licensee agrees not to copy, disassemble, change, extend, add to or otherwise modify the software or the accompanying written materials. However, DNASTAR, Inc. authorizes the licensee to make archival copies of the software for the sole purpose of backing up the licensee's software and protecting the licensee's investment from loss.
3. The licensee agrees not to transfer this software to anyone else without the prior written consent of DNASTAR, Inc.
4. The licensee may run the software on either standalone computers or on networked computers, in accordance with the type of license purchased by the licensee. A standalone computer is one that does not use a network to run or access the software protection system or any of the licensed software modules. A network computer is one that uses a network to run and/or access the software protection system or one or more licensed software modules that are resident on another computer or a server of the network.
 - a. **STANDALONE COMPUTER CUSTOMERS ONLY.** This license permits the licensee to run the software only on standalone computers. The licensee may not run this software on a network computer under this license. The maximum number of computers on which the licensee may install this software may not exceed the number of licenses purchased.
 - b. **NETWORK CUSTOMERS ONLY.** This license permits the licensee to run the software over a network. The licensee may not duplicate and run this software on standalone computers or on any computer that is outside the control of the network licensing protection system provided with the software licensed under this license or any other network licensing protection system explicitly allowed by the licensor. The maximum number of simultaneous users of this software may not exceed the number of licenses purchased. The licensee agrees to employ the network licensing protection system provided with the software or another software

DNASTAR, INC.
LASERGENE SOFTWARE
RESEARCH SITE/PURPOSE LICENSE AGREEMENT

protection system explicitly allowed by the licensor to ensure that the number of concurrent users of the software does not exceed the number of licenses purchased.

5. Notwithstanding Paragraph 2 above, if DNASTAR, Inc. has released subsequent versions of the software and has designated this version of the software as obsolete, DNASTAR, Inc. is not under any obligation to provide any support or service for this version of the software to the licensee, including but not limited to replacement of software access keys.

6. IF THE LICENSEE IS UPGRADING FROM ANY EARLIER VERSION OF THE LASERGENE SOFTWARE TO THIS VERSION OF THE LASERGENE SOFTWARE, THIS AGREEMENT SUPERCEDES ANY EARLIER AGREEMENTS OR LICENSES BETWEEN THE LICENSEE AND DNASTAR, INC. REGARDING ANY EARLIER VERSIONS OF THE LASERGENE SOFTWARE THAT MAY HAVE BEEN PREVIOUSLY PURCHASED FROM DNASTAR, INC.

a. **STANDALONE COMPUTER CUSTOMERS ONLY.** If this license is being installed as an update or upgrade to previously owned licenses, then this Agreement terminates the license(s) for earlier versions of the software that are being upgraded by this software. The licensee agrees to uninstall each such earlier version of the software from standalone computer(s) under the licensee's control. If the licensee holds multiple licensed copies of any such earlier version, installing this software terminates only one such license and the licensee is obligated to uninstall only one such copy of each such version.

b. **NETWORK CUSTOMERS ONLY.** If this license is being installed as an update or upgrade to previously owned licenses, then this Agreement terminates the number of licenses to earlier versions of the software possessed by the licensee equal to the number of licenses purchased under this Agreement. The licensee agrees to uninstall all copies of each such earlier version of the software from all networks under the licensee's control. However, if there are any remaining licenses to an earlier version of the software, because the licensee holds more licenses to that earlier version of the software than the number of licenses purchased under this agreement, the licensee may install, run and/or use one earlier version of the software on another network under the licensee's control. The maximum number of simultaneous users of that earlier version of the software may not exceed the remaining number of licenses held by the licensee. The licensee may not run this software and any previous version of the software on the same network.

7. All computers on which the software is installed must be under the licensee's control, and unless otherwise specified in writing by DNASTAR, Inc., must be located at the organization and address indicated in the licensee's Purchase Order. Installing and using this software elsewhere requires purchase of a separate, valid license agreement.

8. The licensee acknowledges and warrants that the licensee performs research that generates data suitable for analysis using this software at the location indicated in licensee's Purchase Order.

DNASTAR, INC.
LASERGENE SOFTWARE
RESEARCH SITE/PURPOSE LICENSE AGREEMENT

9. The licensee agrees not to use this software to provide any service to any other member of any legal entity that includes the licensee, such services including but not limited to DNA and/or protein sequence editing and/or analysis, sequence and/or contig assembly, protein structure prediction, primer design, gene discovery and/or sequencing project management.
10. The licensee agrees not to use this software 1) to provide any commercial service using this software or 2) to provide any service in connection with any enterprise or activity conducted in whole or in part for a fee, for profit or for reimbursement of cost in any way, except in conjunction with the internal research performed by the licensee for its own research purposes. If the licensee wishes to provide any services using this software on a for-profit, reimbursement of cost, or commercial basis, the licensee must purchase a separate, valid Commercial Use and/or Core Facility license of the Lasergene software module(s) purchased from DNASTAR, Inc.
11. If the licensee violates any of the terms of this agreement, the licensor may terminate the licensee's license to use the software and take other action against the licensee. Upon such termination, the licensee agrees to return all copies of the software and accompanying materials to DNASTAR, Inc. and to delete any and all installed copies of the software from its computers.
12. Use of any other DNASTAR, Inc. software requires separate, valid license agreements executed between the licensee and DNASTAR, Inc.
13. This Agreement is governed by the laws of the State of Wisconsin in the United States of America. Should any part of the Agreement be held invalid, the remainder of the Agreement will still be in effect.
14. **DISCLAIMER:** This software and accompanying documentation is sold "as is" without warranty of any kind, either express or implied. DNASTAR, Inc. EXPRESSLY DISCLAIMS ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. In no event shall DNASTAR, Inc. be liable for any loss of profit or any other commercial damage including but not limited to special, incidental, consequential or other damages.

I accept the terms of this agreement.
