

Sequencing Service

featuring PacBio RS

GATC Biotech is Europe's first sequencing service provider using Pacific Biosciences PacBio RS platform.

"We are delighted that GATC Biotech chose the PacBio RS as a preferred platform for sequencing services. Customers will benefit from the unique advantages of the revolutionary single molecule, real-time (SMRT™) approach to biological detection."

Terry Pizzie
Vice President Europe
Pacific Biosciences

de novo genome sequencing
PacBio RS
strobe & long reads and HiSeq 2000
paired end reads

*de novo assembly of HiSeq paired end reads
scaffolding of HiSeq assembly with
PacBio RS strobe and long reads*

Reduced to the max
reduced number of contigs
maximum scaffold size

EUROPE'S LEADING SEQUENCING SERVICE PROVIDER

Pacific Biosciences
PacBio RS

Illumina
HiSeq 2000

Roche Diagnostics
GS FLX

Applied Biosystems
3730xl DNA Analyzer

Your expert in DNA sequencing
and bioinformatics

All leading sequencing technologies in one lab
10,000 customers in 40 countries
Customised and integrated solutions
20 years of experience

Single read sequencing
ChIP-Seq
SmallRNA / microRNA
Methylome /
epigenome studies
cDNA *de novo* sequencing
Targeted genome re-sequencing
Whole genome re-sequencing
Whole (meta)genome
de novo sequencing
